### DETAILED ACTION

This application filed April 25, 2001, is a continuation of application 09/257,561, filed February 25, 1999, now abandoned, which claims benefit to foreign application 98 103 490.3 filed February 27, 1998 with the EPO.

Applicants' preliminary amendment filed April 25, 2001, paper number 2, has been received and entered. The specification has been amended. Applicants' second preliminary amendment filed April 25, 2001, paper number 3, has been received and entered. Claims 1, 3, 5, 7 and 8 have been amended. Claims 1-11 are pending and currently under examination.

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 10 and 11, drawn to method of modifying the genome of a vertebrate cells capable of regenerating a complete organism comprising integrating into the genome of said cell a first FAT target sequence and exchanging a second FAT containing sequence for said first sequence, classified in class 800, subclass 21; class 514, subclass 44.
- II. Claims 7-9, drawn to cells and isolated nuclei of said cells whose genome comprises a heterologous sequence comprising a FAT sequence, classified in class 435, subclass 325.

Art Unit: 1632

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method could potentially be used to generate transgenic animals (as set forth in claim 10). Further, the isolated cells and nuclei containing the final resulting sequences can be generated by directly inserting the second sequence without going through an intermediate step of integrating the first FAT containing sequence.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1632

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
